Tools you can use:

AAHA/AAFP Pain Management Guidelines Implementation Toolkit

Completed earlier this year, the 2015 AAHA/AAFP Pain Management Guidelines for Dogs and Cats is the most complete and medically sound compilation of updates, insights, advice, and recommendations regarding pain management in companion animals ever deployed. These guidelines help ensure all pets receive regular, appropriate pain management.

In order to help AAHA members implement the recommendations of the guidelines in their practices, we created the 2015 AAHA/AAFP Pain Management Guidelines for Dogs and Cats Implementation Toolkit. The toolkit includes model protocols, client handouts, staff roles and responsibilities, and other tools you can use to ensure your patients receive the best possible care.

We are happy to announce that the online version of this toolkit (aaha.org/professional/resources/pain_management_toolkit.aspx) is now available. We hope you will take advantage of this and other valuable tools we supply to aid you in providing excellent companion animal care.
