

COVID-19

PREPARE. MAKE PLANS.

It's important to have an emergency plan in the event you or a loved one contracts COVID-19.

This includes coordinating care options for family pets.

MAY 2020

- Designate a trusted pet caregiver: family, friend, neighbor, or colleague.
- Record important pet information (feeding plan, medical information, etc.).
- If your pet takes medication, ask your veterinarian for an extra supply.
- Have a carrier, food, extra litter, and other essential supplies on hand.
- Check your area for potential boarding options in the event it's necessary.
- Keep cat's collar, identification, harness, and Go Bag readily accessible.

IF YOU CONTRACT COVID-19:

1. Have another member of your household care for your pet.
2. Restrict contact with your pets and wash your hands often.
3. Wash pet bedding, harnesses, collars, dishes, and toys often.

The CDC reports there is no current evidence that pets can spread the virus that causes COVID-19 to humans.
